- Automated follow-up sequence
- Campaign tracking and handover

Built around your business—not a one-size-fits-all checklist.

We can tailor deliverables, channels, and automation based on your goals, team, and budget. Scope is confirmed before work begins.

IMPORTANT DETAILS

Clear scope. No surprises.

To keep delivery predictable and results measurable, the following terms apply unless your proposal states otherwise.

Advertising budget

Meta and Google ad spend is paid directly by the client and is not included in monthly management fees.

Software and usage fees

Hosting, domain renewals, premium tools, CRM subscriptions, AI usage, phone/SMS charges, and other third-party costs are separate unless specifically listed.

Scope and revisions

Video lengths, revision rounds, page counts, campaigns, workflows, response times, and publishing responsibilities are confirmed in writing before kickoff.

Website work

Website packages use an agreed template and defined page scope. Custom software, e-commerce complexity, copywriting beyond the agreed scope, and major redesigns may require a separate quote.

AI automation

Automations depend on the client’s systems, data, integrations, and provider limits. Any ongoing AI/telephony usage costs are billed separately.

Results

Marketing performance depends on factors including offer, market, competition, budget, website, and sales follow-up. Specific lead, revenue, or ROAS outcomes are not guaranteed.

Payment

Monthly services are billed monthly in advance. One-time launch projects follow an agreed payment schedule before work begins.

Let’s build a system that supports your next stage of growth.

Pricing shown in USD. Final scope and pricing are confirmed in a written proposal.
